

Non Woven Polyester Roll

Bleach & UnBleached Cotton Batting

All Types of Quilts

All Types of Pillows and Fillers

Non Woven Geo Textiles Fabric

Non-woven Polyester Acoustic Sheet

NON WOVEN POLYESTER WADDING ROLLS

We Offer a comprehensive range of Thermally Bonded Polyester Fiber Wadding only (not chemical bonded as it is harmful for our environment and body). These have been developed for use across various applications associated with the manufacturer of upholstered furniture, mattresses, bedding and clothing.

Our Polyester Wadding are supplied in weights ranging from 50gm/sqm - 1200gm/sqm and are offered in roll form to suit customer requirements. Maximum Width can be 3.25 mtr. Length of each roll can be customized as per customer's requirement.

We may not know in our daily lifestyles but Polyfill (formally known as Non Woven Polyester Wadding or Batting Rolls) such as in All Season Polyester Comforters, Fiber Pillows, Oven Gloves, Mattress Topper, Bed

Mattress Protector, Jackets, heat Caps, etc. It's 100% bonded polyester batting which means that fibers with different melting points are passed through a warmer and some of the fibers melt and fuse the rest together. The low loft batting is easy to hand stitch and is perfect for lightweight projects and baby quilts. This wadding is used as a layer of insulation between fabrics - typically used in quilt making. Essentially what it does is fill the quilts enabling them to keep you warm. While polyester is not breathable like many natural fibers it is an excellent choice if you are looking for a thick, washable and very lightweight quilt wadding. It comes in the widest range of lofts and is sometimes blended with cotton to offer the desirable qualities of both fibers. There is no shrinkage with polyester wadding. When polyester is mixed with a natural fiber there is very little shrinkage. Wadding goes by many names such as 'batting', 'padding', 'filling', 'filler' and 'cushioning'. This material can help restore vintage or worn-down furnishings as well as soft toys in need of some love. Made from polyester and inherently fire-resistant, our wadding keeps the heat in like traditional cushioning.

KEY POINTS :

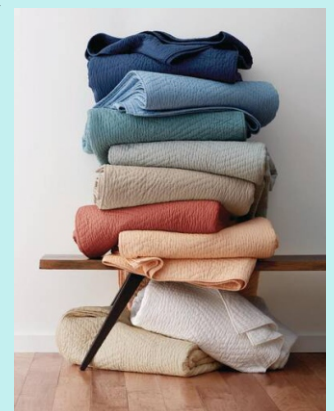

- ❖ Manufacturing between 50GSM to 1200GSM
- ❖ Having Both Virgin and Recycled PSF from renowned manufacturers only
- ❖ Available in different qualities (Micro Siliconised, Semi-Siliconised, Non-Siliconised).
- ❖ Width will be upto 3.25mtr.
- ❖ Completely non toxic and itch free
- ❖ Thickness will be according to GSM but can be customized according to buyer.
- ❖ CERTIFICATES OFFERED or AFFILIATIONS : OEKO TEX 100, ISO, BTRA (test report), FIRE RETARDENT INTERTEK.
- ❖ White Non woven fabric lamination w/o stick to material option available
- ❖ PRODUCTION CAPACITY : 60tons\month

ALL TYPES OF QUILTS :

We take a huge pleasure in market by providing best quality array of Designer Machine Quilts. These quilts are available in many colors and designs as per the changing demands of our customers. These quilts are machines made and look very elite. Highly appreciated for softness and excellent finish, these products are available at affordable prices. We have a colossal throng of AC quilts, dohars, **comforters, Bed Covers, Mattress Protector, Terry Mattress Protector and many more.** All of the units are offered in different material like cotton, polyester, etc. which is also been made in house. You can select the best piece in terms of price, color and personal satisfaction and put an order.

KEY POINTS :

- ❖ Manufacturing between 50gsm to 1000gsm inner Wadding.
- ❖ Having 4 high speed (2000RPM) quilting machine for quilting.
- ❖ Thickness will be according to GSM.
- ❖ Width will be upto 3.50mtr and Length will be 3mtr
- ❖ PRODUCTION CAPACITY will be according to size and design.
- ❖ 8 high speed Stitching machines of Jack

ALL TYPES OF PILLOWS AND FILLERS :

To cater variegated demands of our esteemed clients, we are highly engrossed in manufacturing and supplying a wide range of Fiber Pillow around the world. Our Pillows are designed and manufactured from finest quality material utilizing modern technology. Provided array is highly valued and demanded across the industry for their optimum performance and fine finish with efficient and effective price with timely supply.

KEY POINTS:

- ❖ Manufacturing in all sizes rectangular, round, square, bolsters, etc.
- ❖ Ultra-supportive and ultra-lightweight down-like premium fiberfill
- ❖ A superior alternative to down offers improved hygiene
- ❖ All made from Automatic Opener and filling machines
- ❖ INDIA MANUFACTURED!
- ❖ The fiber fill and permeable pillowcase allow heated air to escape, allowing the pillow to stay cool.
- ❖ Having large varieties of fabric options.
- ❖ All fibers and fabrics has been directly purchased from manufacturers.
- ❖ All work done in In-House.
- ❖ Thickness will be according to Supplier perspective
- ❖ PRODUCTION CAPACITY is 1000pcs/day.
- ❖ 8 high speed Stitching machines of Jack
- ❖ Vacuumed packing options is also available

NON-WOVEN GEO-TEXTILE FABRIC :

Non-woven GEOTEXTILE fabric mainly used in making for Large and big projects such as Highways, Ponds, Tunnels, Drainage, Soil Stabilization, Dams, Thermal Project Plant, etc. and needed in huge quantities and we are here to help in completion of these large works in specified time effectively and efficiently. Our non-woven Geotextile fabric is formed by 100% Polyester or Polypropylene fiber carded into a net and reinforced by hot rollers, which can be produced in different gram mage, thickness and hand feel with good thermal stability, high strength and good washing resistance.

KEY POINTS:

- ❖ Manufacturing between 70gsm to 800gsm of max. width 3.20mtr of GEOTEXTILES.
- ❖ High speed imported 3 Needle Loom of width 4mtr with One Calendaring Machine providing effect
- ❖ on strength and quality of fabric by heating it thermally.
- ❖ Thickness will be according to GSM.
- ❖ Making from both Polyester and Polypropylene Staple Fiber.
- ❖ White Non woven fabric lamination options available.
- ❖ PRODUCTION CAPACITY 50tons\month and upcoming new machinery that will increase it to
- ❖ 100tons\month by the end of this financial year.
- ❖ We are also engage in GEO GRID, GEO COMPOSITE and GEO DRAIN SETS.

NON-WOVEN POLYESTER NEEDLE FELT :

Non-woven Needle Felt fabrics mainly used in Shoulder Pads for Clothing, Fashion Felts, Collar Felts, Rooftop Gardening material, Automobile Insulation, Dusters, Hand Bags, etc. Our non-woven Needle Felt fabric is formed by 100% Polyester or Polypropylene fiber carded into a net which can be produced in different gram mages, thickness and hand feel with high strength and good washing resistance.

KEY POINTS:

- ❖ Manufacturing between 70gsm to 800gsm of max. width 3mtr.
- ❖ High speed imported 3 Needle Loom of width 4mtr with One Calendaring Machine providing effect on strength and quality of fabric by heating it thermally.
- ❖ Thickness will be according to GSM.
- ❖ Making from Polyester. Viscose and Polypropylene Staple Fiber.
- ❖ PRODUCTION CAPACITY 40tons\month and upcoming new machinery that will increase it to 200tons\month by the end of this financial year.
- ❖ White Non woven fabric lamination options available.

NON-WOVEN POLYESTER ACOUSTIC SHEET

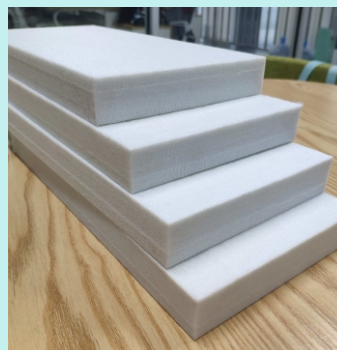

Non-woven Polyester sheet for Acoustic purpose is an eco-friendly product that is greener, recyclable, and easy replacement for mineral wool. The material is also completely non-toxic, itch-free, chemical free and human friendly. This material is lighter than the other insulators. It has higher air-entrapment made possible by the manufacturing process which requires less thickness of insulate compared to other available insulator products. For more heat insulation aluminum foil can also get attached to its surface of 45mic. with any stick material and than can be used as heat as well as sound insulator in any premises. It brings down the insulation installation cost to a fraction of its present value. Polyester insulation material is being extensively used by Indian Railways in its Air - Conditioned coaches, large big Halls, Schools, Universities, etc.

APPLICATION AREAS INCLUDE:

- ❖ COLD STORAGE WALLS AND CEILING INSULATION - existing and new
- ❖ Under roof insulation for metallic or asbestos sheds
- ❖ Under deck areas in walls of commercial, residential and industrial buildings
- ❖ Under roof insulation in fall ceiling of residential projects

KEY POINTS:

- ❖ Density - 16kg/m³ to 40kg/m³
- ❖ Thickness - 12mm to 50mm
- ❖ Roll Length - 20mtr
- ❖ Roll Width - 4ft. to 10ft (standard is 4ft.)
- ❖ Thermal Conductivity - 0.034W/m.k.
- ❖ Acoustic Insulation with NRC of 0.80.
- ❖ Fire Retardant
- ❖ Completely non toxic and itch free
- ❖ Temperature Range of -5 to 120 degree C
- ❖ White Non woven fabric or Aluminum foils laminated options available.

BLEACHED AND UN-BLEACHED COTTON WADDING ROLLS

We are engaged in manufacturing and supplying Cotton Wadding (Both Bleached and Unbleached). Our products find a wide range of applications such as quilts, shoulder pads, baby wraps and upholstery. Use of eco-friendly certified chemicals and high grade cotton fiber result in the weaving of extra soft and thick wadding. Easily washable and less prone to shrinkage, Cotton Wadding is highly appreciated by our customers. It is used largely for both commercial and residential purposes due to high absorption and strength of our products.

Our Cotton Wadding are supplied in weights ranging from 120gm/sqm – 500gm/sqm and are offered in roll form to suit customer requirements. Maximum Width can be 3 mtr. Length of each roll can be customized as per customer's requirement (standard is 50mtr\roll). We also offer different range of width of 40" rolls also wrapped in brown paper of 8mtr or 10mtr length for small buyers or sampling purpose.

Most wadding will shrink at least 1% when washed, but Cotton Wadding, can shrink up to 5% due to its nature as it is fully natural fiber not man-made fibers.

KEY POINTS :

- ❖ Manufacturing between 120GSM to 500GSM
- ❖ Having Both Bleached and Unbleached Cotton Rolls quality
- ❖ Available in different qualities (Non-Bonded, Chemical Bonded, Needle Punched) Width will be upto 3mtr.
- ❖ Completely non toxic and itch free
- ❖ Thickness will be according to GSM.
- ❖ CERTIFICATES OFFERED or AFFILIATIONS: GOTS, OEKO- TEX 100, ISO.
- ❖ PRODUCTION CAPACITY :40tons\month
- ❖ White Non woven fabric lamination w\o stick to material option available
- ❖ Also have 40 inches rolls in 8mtr and 10mtr length wrapped in Brown Paper

About us

Providing quality and perfection in all our product offerings has been the sole objective of Pyramid Fibecot (P) Ltd. Ever since the idea emerges of starting this line in year 2016. Constantly aiming for total customer satisfaction, we have carved a special niche for ourselves in this highly competitive industry. We are an acclaimed manufacturer, supplier and exporter of premium quality of Non Woven Polyester Wadding, Bleached and Unbleached Cotton Wadding, Non Woven Polyester and Polypropylene Geotextiles and Geotextile bags, Quilts and Comforters with Pillows , etc. meant for various home furnishings and various industrial purposes. . A mixture of all the above and years of knowledge in this field have made us a sought-after firm as we only believe in best of our quality.

Pyramid Fibecot (P) Ltd. was incepted in the year 2017 with aim of providing complete range of technical home furnishing and industrial textile products. It is an ISO 9001 : 2015, GMP, CE, ISO 13485 : 2016 and affiliating many certificates as per Buyer's requirement. It is one of the emerging Manufacturer, Supplier and Exporter of technical home furnishing and industrial textile products. The Company gives out its best quality textile products to a number of clients. We had a fully automatic hydraulic plant with all modern machineries & Infrastructural facilities.
